SECTION

Dear Mr. Altur:

Please find enclosed a copy of the revisions for the Illinois American Water Company Wells #1 & #3 screening site inspection (SSI), ILD 981958291. These revisions have addressed all the comments contained within the letter received on April 24, 1990. Please replace the written report, appendix cover pages, the last page of appendix C, form 2070-13 and the HRS package.

The groundwater flow information gathered during the Illinois American Water Company Wells #1 and #3 SSI is inconclusive to ascertain that the PRP is contaminating the public wells, therefore, the site should continue to the LSI stage to gain more information. When the contamination source has been positively identified, Illinois American Water Company Wells #1 and #3 can be dropped from CERCLIS and the source added.

Should you have any questions or additional comments concerning the enclosed documents, please feel free to call Tim Murphy at 217/782-6760.

Sincerely,

Thomas Crause
